

## **ANNOUNCEMENT**

18 November 2016

### **SLP named one of Australia's fastest growing companies**

Sell Lease Property Ltd (SLP) has this week been named one of Australia's fastest growing companies with a top 10 finish in the **2016 BRW Fast 100**.

The diversified real estate firm was ranked eighth overall in the prestigious annual table with year on year revenue growth of 188.7 per cent for the 2016 financial year. The outstanding result brings total growth over the past two financial years to 370 per cent.

A key driver of the growth has been the firm's burgeoning Real Estate business with strong revenue contributions also coming from their Mortgage Broking, Conveyancing and Property Management businesses.

ServTech Global, the 100 per cent owner of SLP, is a leading Software as a Service (SaaS) business. SLP utilises ServTech Global's disruptive SaaS technology and service platform to increase operational efficiencies, affording it a number of competitive advantages over its more traditional competitors within the real estate industry.

The BRW Fast 100 features the fastest growing companies in Australia throughout the financial year with prospective companies being ranked according to their year on year revenue growth in percentage terms.
